

Ideas for a

Digital Prayer Submission

The MediaFest Committee would like to encourage classes to submit a digital prayer. This prayer should take the form of a multi-media presentation which could include audio and visual components. Example: PowerPoint or Frames4 slide show with student art work and voice over. <http://www.youtube.com/watch?v=n8IZKcQwsYc>

The prayer can be a traditional prayer or one that your class creates.

Classes can illustrate or photograph images for the visual portions of the prayer and create a sound track of students reciting the prayer.

STEPS for Creating a Digital Prayer

1. Create a prayer with your class or select a prayer to illustrate.
2. Divide the prayer into sections and have the students illustrate, create a collage or photograph a drama tableau for each section.
3. Place all digital images into a file folder.
4. Using the software such as Frames 4 (or similar) create a movie by inserting the files and recording the students' recitation of the prayer.
5. Save the project.

Primary classes can have the student's illustrate or paint a picture that can be photographed or scanned to create a digital file.

Junior and Intermediate classes can use the Text editor and graphics library located within the Frames 4 software to create their digital images.
