

# Health factor Part 3

The  
Presentation

Name: \_\_\_\_\_  
Organ: \_\_\_\_\_

## Step 1

Which parts of your 'healthy model' represent real characteristics?

---

---

---

## Step 2

Which parts of your 'unhealthy model' represent poor condition?

---

---

---

## Step 3

What might cause this poor condition?

---

---

## Step 4

How would other organ systems be directly effected by this organ's condition?

---

---

---

## Step 5

If you had unlimited time and materials, how would you make even more realistic models?

---

---

---
